5.0 Long term KPIs and Progress

About this report

We are pleased to present our sustainability report, outlining our commitment to responsible business practices and our efforts to address the environmental, social, and governance (ESG) challenges facing our industry. This report covers the period from **XXXX to XXXX** and is intended to provide stakeholders with a transparent and comprehensive view of our sustainability journey, progress and achievements

Scope of the Report

This report covers the operations of our business, including our supply chain and logistics activities. It includes information on our efforts to reduce our environmental impact, enhance our social and community engagement, and strengthen our governance practices. Our reporting is guided by the United Nations Sustainable Development Goals (UNSDGs).

Disclosures and Caution

We have made every effort to ensure the accuracy and reliability of the information presented in this report. However, as with any report of this nature, there may be limitations and potential inaccuracies due to factors such as data availability, estimation, and interpretation. Additionally, our reporting is based on the most current and relevant data available at the time of publication, which may not reflect developments that have occurred after the report's publication. Additionally, any forward-looking statements are subject to risks that are beyond our control. **For feedbacks, please write at [sustainability@companyname.com].**

Basis of Reporting

Our sustainability reporting is based on the U.N. Global Compact's SDGs, which provide a framework for measuring and reporting on our ESG performance. We have identified the SDGs that are most relevant to our business and are actively working to integrate them into our business operations. We hope that this report provides valuable insight into our sustainability performance and our commitment to responsible business practices.

OUR APPROACH TO SUSTAINABILITY

We recognize that sustainability is a critical component of our business strategy and operations. We are committed to managing our environmental, social, and governance (ESG) risks and opportunities in a responsible and transparent manner. In this section, we will outline our approach to sustainability, including our materiality assessment, structure of our sustainability efforts, and reporting based on the United Nations Global Compact's Sustainable Development Goals (SDGs).

Bringing Together the 'E', 'S', & 'G'

Despite good intentions – and widespread acceptance of the importance of sustainability – there is still a lack of clarity about how companies should go about setting the sustainability agenda and accountabilities around it. This confusion is not surprising. While other functions and roles, such as CEO, CFO, COO are well established, in most cases the person responsible for sustainability is constrained by a limited and different remit – reporting to the COO when emphasizing an efficiency role; to the CFO when the focus is on investor relations; to the chief communications officer when PR is important; or to the general counsel when attention is on compliance. In some other cases, the role is distributed over two or three different departments.

ESG separation is not uncommon: the “E” of environmental under the COO, the “S” of social under the CHRO, and the “G” of governance under corporate legal. We’ve been here before. Fragmentation and a lack of clarity is common when new roles are introduced; think for example of the rise of the chief digital officer or the chief innovation officer in C-suites over the last decade or so.

Materiality

Materiality serves as our guiding compass, directing our focus toward the essential elements in our ESG journey. It serves as the defining factor in shaping our strategy, ensuring that we generate a meaningful impact where it matters most.

In our unwavering commitment to transparency and accountability, this section undertakes a deep dive into the nuanced concept of materiality within the expansive framework of ESG reporting. Materiality emerges as our indispensable guide, aiding us in the discernment and prioritization of key issues that bear significant weight for both our operational landscape and our stakeholders. This comprehensive report unfolds the layers of our materiality assessment process, shedding light on the intricacies of the identified material issues and elucidating how they intricately weave into the fabric of our ESG strategy.

Materiality, at its core, revolves around the relevance and significance of specific issues to our business and stakeholders. These identified issues wield the potential to influence decision-making processes, sculpt perceptions, and fundamentally impact the overall sustainability of our operations. Our commitment to honing on material issues underscores our dedication to ensuring that our ESG initiatives align seamlessly with stakeholder concerns and fundamental business imperatives.

Within the expansive realm of our ESG journey, the materiality assessment takes centre stage as a pivotal framework for the identification and prioritization of issues that carry the utmost significance to both our operational ethos and the stakeholders we serve. This dedicated section not only outlines the contours of our meticulously crafted materiality assessment process but also casts a spotlight on the discerned material issues, illustrating how they function as the guiding force propelling our tailored and dynamic ESG strategy.

Materiality Matrix

A FRAMEWORK TO EXECUTE OUR APPROACH

To clear the fog and help us create a roadmap, we created a simple visual framework. While the ESG goal setting and tracking is marked against UNSDG's we follow the eight distinct task streams as below:

Ensuring Regulatory Compliance

Anticipate regulatory trends and their implications. Establish adherence to the sustainability laws and regulations that apply to our industry.

ESG Monitoring And Reporting

Collect data and metrics following the reporting standards. Benchmark with industry peers. Prepare the completion and communications of company ESG report.

Overseeing Sustainability Efforts

Planning, coordinating, reviewing progress, and tracking results to coordinate various operational efforts.

Managing Stakeholders' Relationships

Promote ongoing dialogue with internal and external stakeholders in order to develop constructive, transparent relationships.

Building Organizational Capabilities

Identify gaps and adopt appropriate educational initiatives for upskilling and/or sourcing the missing capabilities. Identify innovative ways to scale the new capabilities. Share and disseminate knowledge and best practices.

Fostering Culture Change

Help define and communicate purpose to drive the change. Champion cultural change across the entire organization also through education. Promote mindset shifts based on concrete behaviors. Establish routines to reinforce the change, for a credible "walk the talk" from leaders.

Scouting And Experimenting

Promote openness toward the external innovation ecosystem. Explore emerging sustainability technologies, solutions, and practices. Test the applicability and learn from experiments. Scale up adoption in the broader organization.

Supply Chain Sustainability Integration

Supplier assessments based on environmental and social practices, responsible material sourcing to reduce the carbon footprint, logistics optimization for lower emissions, transparency in sharing supply chain practices, and ongoing efforts to monitor and improve sustainability.

Environment

We are committed to minimizing our environmental impact by reducing our greenhouse gas emissions, conserving natural resources, and promoting sustainable business practices.

Social

We recognize the importance of our social impact and strive to promote the health, safety, and well-being of our employees, customers, and communities.

Governance

We are committed to maintaining high standards of corporate governance, including transparency, accountability, and ethical.

Environmental

COMPANY NAME is committed to creating a sustainable future by adopting the United Nations Sustainable Development Goals (SDGs).

Reduce our environmental footprint and contribute to the United Nations Sustainable Development Goals (UNSDGs) related to environmental sustainability. In this report, we will discuss our goals and the impact we aim to create in three specific areas: SDG 12 (Responsible Consumption and Production), SDG 13 (Climate Action), and SDG 17 (Partnerships for the Goals).

Social

COMPANY NAME is committed to sustainable development and has adopted several UN SDGs as part of our social sustainability strategy.

In this report, we discuss the impact we want to make on UN SDGs 3, 4, 5, and 10, our adopted goals. We aim to be a catalyst for positive change and create lasting social impact.

Governance

Our company is committed to governance aspect of sustainable development and has adopted several UN SDGs as part of our sustainability strategy. In this report, we discuss UN SDGs 8 and 16, our adopted goals, and the impact we aim to create in these areas.

These goals align with our commitment to sustainable development, responsible business practices, and promoting social and economic justice.

Highlighting Priority Targets and Overall Performance

As in other areas of corporate activity, we track our sustainability journey through achievable short- and long-term goals and setting KPI's & targets against them.

Structure of Our Sustainability Efforts

To ensure that we focus on the most material ESG issues for our business, we conduct a materiality assessment that takes into account the views of our stakeholders and the impact of our operations. Based on this assessment, we identify the SDGs that are most relevant to our business and are actively working to integrate them into our business operations. Our reporting on the SDGs is structured as follows:

Adopted Goals

Good Health and Wellbeing (S)

Quality Education (S)

Gender Equality (S)

Decent Work and Economic Growth (G)

Reduced in Inequalities (S)

Climate Action (E)

Responsibility Consumption and Production (E)

Peace and Justice (G)

Partnership for the Goals (E)

SDG Mapping for Existing ESG Reporting Practices

Mapping involves the use of NSS ESG sustainability measurement tools that allow goal setting, highlighting criticality, tracking, measurement and management of SDG's within the organisation breaking silos around departments. By adopting NSS ESG sustainability management system we hope to significantly improve demonstration of our commitment and value of sustainability to stakeholders.

1 NO POVERTY

End poverty in all its forms everywhere

ABOUT THIS GOAL

SDG 1 calls for the eradication of extreme poverty and the reduction of poverty in all its forms worldwide. It demands that all people have equal rights to economic resources, social protection, and basic services. For organisations, this means ensuring fair wages, responsible sourcing, and community investment that creates opportunity rather than perpetuating poverty cycles across the value chain.

KEY UN TARGETS

- 1.1 Eradicate extreme poverty for all people everywhere, currently measured as living on less than \$1.25 a day.
- 1.3 Implement nationally appropriate social protection systems and measures for all, achieving substantial coverage of the poor and the vulnerable.
- 1.4 Ensure that all men and women have equal rights to economic resources, access to basic services, and ownership of property.

#EndPoverty

Eradicate extreme poverty for everyone, everywhere

OUR APPROACH

We recognise that businesses play a central role in creating economic opportunity and breaking poverty cycles. Our approach to SDG 1 focuses on paying living wages to all employees and contractors, investing in local communities where we operate, and ensuring that our supply chain practices support economic empowerment rather than exploitation. We actively track our poverty-related risks and contributions, and report transparently on our progress against community and wage commitments.

MATERIAL TOPICS

#Fair & Living Wages . #Community Investment . #Supply Chain Ethics . #Financial Inclusion . #Social Protection

Economic inequality and fair pay emerged as a material topic through stakeholder engagement, particularly from employee and community representatives. Our practices on wages, procurement, and community investment directly determine whether we contribute to or reduce poverty in the communities where we operate.

OBJECTIVES

- ☒ **Achieve 100% Living Wage Coverage Across Direct Operations**
Conduct an annual living wage assessment for all direct employees, benchmark against the applicable local living wage standard, and close any identified gaps through a time-bound remediation plan published in the ESG report.
- ☒ **Invest in Community Economic Development Programmes**
Allocate a defined percentage of pre-tax profit to community investment activities that create sustainable economic opportunities, with priority given to disadvantaged communities in our operating geographies.
- ☒ **Embed Poverty Risk Assessment Across Our Supply Chain**
Conduct poverty and fair pay risk assessments for all tier-one suppliers, requiring corrective action plans for any identified non-conformances and reporting supplier wage compliance rates annually.

KEY PERFORMANCE INDICATORS

- 1 Living Wage Coverage Rate (% of direct workforce)**
Track and report the percentage of direct employees receiving at or above the local living wage benchmark. Target: 100% of all direct and indirect employees within the reporting period.
- 2 Community Investment Spend (£ / % of pre-tax profit)**
Report total community investment spend and as a percentage of pre-tax profit annually. Target: minimum 1% of pre-tax profit directed to community economic development, with outcomes tracked and published.
- 3 Supply Chain Fair Pay Audit Completion Rate (%)**
Report the percentage of tier-one suppliers completing a fair pay and labour conditions audit. Target: 100% of high-risk suppliers audited, with corrective action plans in place for all identified issues.

2 ZERO HUNGER

End hunger, achieve food security, improved nutrition and promote sustainable agriculture

ABOUT THIS GOAL

SDG 2 addresses global hunger and malnutrition, calling for sustainable food systems that ensure year-round access to sufficient, safe, and nutritious food. It promotes sustainable agricultural practices, biodiversity, and resilient food supply chains. For organisations, this means responsible procurement, reducing food waste, supporting sustainable farming, and ensuring employee access to adequate nutrition.

KEY UN TARGETS

- 2.1 End hunger and ensure access by all people to safe, nutritious and sufficient food all year round.
- 2.4 Ensure sustainable food production systems and implement resilient agricultural practices that maintain ecosystems.
- 2.c Adopt measures to ensure the proper functioning of food commodity markets and facilitate timely access to market information.

OUR APPROACH

Our connection to SDG 2 is primarily through our supply chain practices, food-related operations, and employee welfare commitments. We are committed to responsible agricultural sourcing that supports sustainable farming practices and avoids contributing to food insecurity. We partner with suppliers who demonstrate environmental stewardship, fair treatment of agricultural workers, and resilient food production systems, while working to reduce food waste throughout our operations.

MATERIAL TOPICS

#Sustainable Agriculture . #Food Security . #Food Waste Reduction . #Responsible Sourcing . #Supply Chain Resilience

Our materiality assessment flagged sustainable sourcing and food security as relevant through supply chain analysis and stake holder engagement. The risk of unsustainable agricultural practices in our supply chain presents operational, reputational, and long-term resilience risks that we actively manage.

OBJECTIVES

- ☒ **Source 100% of Key Agricultural Commodities Sustainably**
Map all agricultural commodity supply chains, establish sustainability criteria aligned to leading certification schemes, and achieve 100% certified sustainable sourcing for priority commodities within a defined timeframe.
- ☒ **Reduce Operational Food Waste by 50% by 2030**
Conduct a baseline food waste audit across all relevant operations, set site-level reduction targets, and implement waste prevention programmes including staff education, portion management, and redistribution partnerships.
- ☒ **Support Supplier Agricultural Sustainability Capacity Building**
Provide agricultural suppliers with access to sustainability training, best-practice guidance, and financial support where needed to transition to more sustainable and resilient farming practices.

KEY PERFORMANCE INDICATORS

- 1 Sustainable Commodity Sourcing Rate (%)**
Track the percentage of key agricultural commodities sourced from certified sustainable sources. Target: 100% for all priority commodities by the target date, with annual progress milestones published.
- 2 Food Waste Volume (tonnes) & Reduction Rate (%)**
Report total food waste generated across operations in tonnes and as a year-on-year reduction percentage. Target: 50% absolute reduction from the baseline year by 2030.
- 3 Supplier Sustainability Training Participation (%)**
Report the percentage of agricultural suppliers completing sustainability training or capacity-building programmes. Target: 80% of tier-one agricultural suppliers reached within the reporting period.

3 GOOD HEALTH AND WELL-BEING

Ensure healthy lives and promote well-being for all at all ages

ABOUT THIS GOAL

SDG 3 calls for universal health coverage, the end of preventable deaths, and access to quality healthcare for all people at all ages. For organisations, this means actively safeguarding workforce health — physical, mental, and emotional — and contributing to wider public health outcomes through responsible business practices and proactive well-being investment across the entire employee lifecycle.

KEY UN TARGETS

- 3.4 Reduce premature mortality from non-communicable diseases by one-third through prevention and treatment.
- 3.8 Achieve universal health coverage, including access to quality essential health-care services and medicines for all.
- 3.d Strengthen national and global capacity for health risk reduction, early warning, and management of health risks.

OUR APPROACH

Healthy people are the cornerstone of a sustainable organisation. We integrate health and safety governance into our core operations — from rigorous occupational safety standards and comprehensive healthcare benefits, to proactive mental health programmes and flexible working arrangements. We are committed to going beyond compliance, embedding a genuine culture of well-being that ensures every individual can thrive, with performance benchmarked annually against international sector standards.

MATERIAL TOPICS

#Access to Healthcare . #Mental Health & Wellbeing . #Occupational Health & Safety . #Work-Life Balance . #Family-Friendly Policies

Our materiality assessment identified health and well-being as a priority area based on employee surveys, stakeholder consultations, and sector benchmarking. These material topics reflect direct exposure to regulatory, reputational, and operational risk related to our workforce’s health outcomes.

OBJECTIVES

- ☒ **Implement a Robust ISO 45001-Aligned OHS Management System**
Embed an Occupational Health & Safety framework across all operations with regular audits, incident tracking, contractor management protocols, and continuous improvement processes to ensure a zero-harm environment.
- ☒ **Launch a Company-Wide Mental Health Programme**
Provide confidential counselling access, train Mental Health First Aiders in every department, and foster psychological safety through structured manager-led well-being conversations and peer-support networks.
- ☒ **Guarantee Equitable Healthcare Access for All Employees**
Ensure all employees — regardless of role, location, or contract type — receive comprehensive healthcare coverage, including preventative care, chronic condition management, and mental health services with no coverage gaps.

KEY PERFORMANCE INDICATORS

- 1 Total Recordable Incident Rate (TRIR)**
Monitor and report workplace injury frequency annually. Target: TRIR below the industry benchmark with a minimum 10% year-on-year reduction, embedded in operational leadership score cards.
- 2 Mental Health Programme Utilisation Rate (%)**
Track employees actively engaging with mental health support and EAP services. Target: 70% workforce awareness and 40% active participation by end of fiscal year with quarterly reviews.
- 3 Healthcare Benefit Coverage Rate (%)**
Report on employees with access to comprehensive health and wellness benefits. Target: 100% coverage across all employment levels, contract types, and geographies with no exceptions.

4 QUALITY EDUCATION

Ensure inclusive and equitable quality education and promote lifelong learning opportunities for all

ABOUT THIS GOAL

SDG 4 aims to ensure inclusive and equitable quality education and promote lifelong learning opportunities for all. For organisations, this translates into robust employee training and development investment, equal access to learning opportunities, support for youth employability, partnerships with educational institutions, and programmes that empower employees to continuously build skills relevant to the future of work.

KEY UN TARGETS

- 4.4 Increase the number of youth and adults with relevant skills, including technical and vocational skills, for employment.
- 4.5 Eliminate gender disparities in education and ensure equal access to all levels of education for the vulnerable.
- 4.7 Ensure all learners acquire knowledge and skills needed to promote sustainable development and global citizenship.

OUR APPROACH

We believe that access to quality education and lifelong learning is both a fundamental right and a business imperative. Our approach to SDG 4 focuses on creating structured, accessible learning pathways for all employees, supporting youth education through apprenticeship and internship programmes, and partnering with educational institutions to build future talent pipelines. We invest in digital learning platforms and ensure equitable access to development opportunities regardless of role level, location, or background.

MATERIAL TOPICS

#Employee Training & Development . #Skills Development . #Apprenticeships & Internships . #Equal Access to Learning . #Digital Skills

Training and development ranked highly in our materiality assessment as both a workforce expectation and a strategic business need. Failure to invest in skills development presents talent retention, capability, and competitiveness risks, while quality learning investment directly supports our people's growth and the organisation's long-term resilience.

OBJECTIVES

- ☒ **Provide Structured Learning Pathways for Every Employee**
Develop and implement role-specific learning pathways for all employees, including access to digital learning platforms, funded professional qualifications, and minimum annual training hour commitments tracked in the ESG report.
- ☒ **Launch an Apprenticeship and Early Careers Programme**
Establish or expand a structured apprenticeship and early careers programme that provides quality vocational education and employment pathways for young people, with measurable intake targets each year.
- ☒ **Ensure Equal Access to Development Opportunities**
Audit training participation by gender, seniority, and location to identify access gaps. Implement targeted interventions to eliminate disparities and ensure every employee has an active personal development plan.

KEY PERFORMANCE INDICATORS

- 1 Average Training Hours per Employee per Year**
Report average annual training and development hours per employee by gender and level. Target: minimum 40 hours per employee per year with a year-on-year increase in investment per head.
- 2 Training Participation Rate (% of workforce)**
Track the percentage of employees completing at least one formal learning activity in the reporting year. Target: 100% of all employees with an active development plan and at least one completed training.
- 3 Apprenticeship & Early Careers Intake (number / year)**
Report the number of apprentices and graduates taken into the programme each year, with targets aligned to business growth. Track and report conversion to permanent employment rates.

5

GENDER
EQUALITY

Achieve gender equality and empower all women and girls

OUR APPROACH

Achieving genuine gender equality is not merely a compliance obligation — it is a strategic imperative and a clear reflection of our core values. Our commitment to SDG 5 spans the entire employee lifecycle: from inclusive recruitment and equitable pay structures, to leadership development programmes actively advancing women into positions of influence. We hold ourselves accountable through transparent pay gap reporting, representation targets at every seniority level, and policies enabling all employees to balance professional and personal responsibilities.

MATERIAL TOPICS

#Gender Pay Equity . #Women in Leadership . #Inclusive Recruitment . #Parental Leave . #Discrimination Prevention

Stakeholder and employee assessments consistently rank gender equality among our highest-priority material topics. Pay inequality, insufficient female representation in leadership, and exclusionary workplace practices carry significant legal, reputational, and talent-acquisition implications that we actively manage.

OBJECTIVES

Achieve >=40% Female Representation in Senior Leadership

Drive measurable gender parity across senior management, director, and board-level positions through structured talent pipeline development, targeted sponsorship, and inclusive promotion processes.

Introduce Equal, Gender-Neutral Parental Leave Policy

Develop and implement a comprehensive parental leave policy providing equal, fully-paid leave entitlements to all parents regardless of gender, removing structural barriers to women's career progression.

KEY PERFORMANCE INDICATORS

Gender Pay Gap (% median & mean)

Measure and report median and mean gender pay gap annually by seniority band. Target: eliminate all statistically significant gaps and publish full methodology and results in the annual ESG report.

Women in Leadership (% at each level)

Track women in senior management, director, and C-suite roles. Target: >=40% female representation at each level, with year-on-year progression milestones and public reporting.

Parental Leave Return & 12-Month Retention Rate (%)

Report employees returning and remaining following all forms of parental leave. Target: >=90% return rate and >=85% 12-month retention rate across all genders.

6 CLEAN WATER AND SANITATION

Ensure availability and sustainable management of water and sanitation for all

ABOUT THIS GOAL

SDG 6 calls for universal access to safe and affordable drinking water, adequate sanitation, and the protection of water-related ecosystems. It urges organisations to adopt sustainable water management practices, reduce water consumption and pollution, and contribute to the availability of clean water for communities and ecosystems that depend on shared water resources in their operating geographies.

KEY UN TARGETS

- 6.3** Improve water quality by reducing pollution, eliminating dumping and minimising release of hazardous chemicals and materials.
- 6.4** Substantially increase water-use efficiency across all sectors and ensure sustainable withdrawals and supply of freshwater.
- 6.6** Protect and restore water-related ecosystems, including mountains, forests, wetlands, rivers and lakes.

Sustainable Development Goal 6: Clean Water and Sanitation

OUR APPROACH

Water is a finite shared resource and we recognise our responsibility to manage it wisely. Our approach to SDG 6 focuses on reducing water consumption across all operations, eliminating water pollution at source, and ensuring responsible management of wastewater. We conduct water risk assessments for all sites operating in water-stressed areas, implement targeted reduction programmes, and engage with our supply chain to improve water stewardship standards throughout the value chain.

MATERIAL TOPICS

#Water Conservation . #Wastewater Management . #Water Risk Assessment . #Water Pollution Prevention . #Sustainable Sanitation

Water usage and stewardship were identified as material topics through our environmental risk assessment and operations in water-stressed geographies. Regulatory exposure, reputational risk, and operational continuity in water-scarce regions make responsible water management a business-critical priority.

OBJECTIVES

- ☒ **Reduce Water Consumption Intensity by 30% by 2030**
Set site-level water consumption baselines and implement targeted reduction programmes across all operations, with priority given to sites in high water-stress areas, targeting a 30% intensity reduction by 2030.
- ☒ **Achieve Zero Process Wastewater Discharge to Waterways**
Implement closed-loop water recycling systems at manufacturing and processing sites, treating all process wastewater to the required standard before any discharge and targeting zero direct discharge to natural waterways.
- ☒ **Conduct Water Risk Assessments at All Key Operating Sites**
Complete AQUEDUCT or equivalent water risk assessments for all key operational sites, integrating results into the enterprise risk register and developing site-specific water stewardship plans for high-risk locations.

KEY PERFORMANCE INDICATORS

- 1 Water Consumption (m³) & Intensity Ratio**
Report total water withdrawal by source and water intensity ratio (m³ per unit of revenue or production) annually. Target: 30% reduction in water intensity from the baseline year by 2030.
- 2 Percentage of Sites in High Water-Stress Areas with Plans (%)**
Track the percentage of sites identified as operating in high water-stress areas that have a formal water stewardship plan in place. Target: 100% of high-risk sites with active plans.
- 3 Wastewater Recycled or Reused (%)**
Report the percentage of total wastewater generated that is recycled or reused within operations. Target: year-on-year improvement toward zero process wastewater discharge to the environment.

7 AFFORDABLE AND CLEAN ENERGY

Ensure access to affordable, reliable, sustainable and modern energy for all

ABOUT THIS GOAL

SDG 7 promotes universal access to affordable, reliable, sustainable, and modern energy for all. It calls for a substantial increase in renewable energy's share in the global energy mix and a doubling of the global rate of energy efficiency improvement. For organisations, this means transitioning energy supply to renewables, reducing consumption through efficiency measures, and supporting clean energy access across their supply chains and communities.

KEY UN TARGETS

- 7.2** Increase substantially the share of renewable energy in the global energy mix.
- 7.3** Double the global rate of improvement in energy efficiency.
- 7.a** Enhance international cooperation to facilitate access to clean energy research and technology.

OUR APPROACH

Energy transition is at the heart of our sustainability strategy. We are actively transitioning our operations to renewable energy sources, investing in energy efficiency technologies, and working to reduce energy consumption intensity across all sites. Our energy strategy is guided by science-based targets and aligned to the IEA Net Zero Emissions scenario. We engage our supply chain to improve energy performance and report annually on our energy transition progress in full alignment with the GHG Protocol.

MATERIAL TOPICS

#Renewable Energy Transition . #Energy Efficiency . #Clean Technology Investment . #Energy Consumption Reduction . #Carbon Reduction

Energy management and transition to renewables ranked as a top material issue based on climate risk exposure, regulatory trajectory, investor expectations, and the direct link between energy consumption and our Scope 1 and 2 GHG emissions. Energy is our largest single source of operational emissions and our most significant lever for climate action.

OBJECTIVES

- ☒ **Transition to 100% Renewable Electricity by 2030**
Transition all electricity consumption to renewable sources by 2030 through a combination of on-site generation, Power Purchase Agreements (PPAs), and REGo certificates, with an interim 60% target by FY2026.
- ☒ **Reduce Energy Consumption Intensity by 25% by 2030**
Implement energy audits across all key sites, develop site-level energy efficiency roadmaps, and invest in smart metering, LED lighting, building management systems, and process efficiency upgrades to drive a 25% intensity reduction.
- ☒ **Invest in Clean Energy Innovation and Supply Chain Transition**
Allocate R&D investment to clean energy technologies, share energy efficiency best practices with suppliers, and engage the top 50% of energy-intensive suppliers in developing their own energy transition plans.

KEY PERFORMANCE INDICATORS

- 1 Renewable Energy Consumption (% of total)**
Report the percentage of total energy consumption from renewable sources. Target: 60% by FY2026 and 100% by FY2030, reported with full GHG Protocol methodology including any REGos applied.
- 2 Total Energy Consumption (MWh) & Intensity Ratio**
Report absolute energy consumption and energy intensity per unit of revenue or production. Target: 25% reduction in energy intensity from the baseline year by 2030.
- 3 Energy Cost Savings from Efficiency Measures (£)**
Track and report cumulative energy cost savings achieved through efficiency investments. Report annually with breakdown of savings by site and technology type to demonstrate return on investment.

8 DECENT WORK AND ECONOMIC GROWTH

Promote inclusive and sustainable economic growth, employment and decent work for all

ABOUT THIS GOAL

SDG 8 promotes sustained, inclusive, and sustainable economic growth, full productive employment, and decent work for all. It calls on businesses to create quality jobs, protect labour rights, eliminate forced labour and child labour, and invest in workforce skills. Organisations are central to delivering on this goal through their employment practices, economic contributions, and supply chain labour standards across the full value chain.

KEY UN TARGETS

- 8.5** Achieve full and productive employment and decent work for all, including equal pay for work of equal value.
- 8.6** Substantially reduce the proportion of youth not in employment, education or training.
- 8.8** Protect labour rights and promote safe and secure working environments for all workers.

OUR APPROACH

We believe decent, meaningful work is a fundamental human right and a driver of individual dignity and organisational productivity. Our commitment to SDG 8 is expressed through fair pay, secure working conditions, progressive skills development, and an unwavering stance against modern slavery across our entire value chain. We invest in the continuous professional growth of our people, knowing that skilled, motivated, and fairly rewarded employees drive sustainable business performance and long-term value creation for all stakeholders.

MATERIAL TOPICS

#Skills Development & Training . #Fair Wages & Compensation . #Labour Rights & Standards . #Modern Slavery Prevention . #Youth Employment

Our materiality process identified decent work as critical for both business resilience and wider stakeholder commitments. Talent retention and labour rights risks — whether direct or in the supply chain — present significant legal, reputational, and ethical exposure that we actively manage through policy, monitoring, and independent auditing.

OBJECTIVES

- ☒ **Invest in Continuous Skills & Career Development for All**
Provide every employee with structured learning pathways — mentoring, funded external training, digital learning platforms, and workshops — committing to a minimum annual training hours target per employee, tracked and published in the ESG report.
- ☒ **Implement a Living Wage Commitment Across All Operations**
Ensure all direct employees are paid at or above the applicable local living wage benchmark, and develop a phased roadmap to extend this to tier-one suppliers through contractual requirements and capacity-building support.
- ☒ **Eliminate Modern Slavery Risk Across Our Value Chain**
Conduct annual Modern Slavery risk assessments using a tiered approach, ensuring 100% of high-risk tier-one suppliers complete independent labour rights audits with corrective action plans tracked to resolution.

KEY PERFORMANCE INDICATORS

- 1 Average Training Hours per Employee per Year**
Report average annual training hours per employee by gender and seniority. Target: minimum 40 hours per employee per year, with a year-on-year increase in learning investment per head.
- 2 Living Wage Coverage Rate (% of direct workforce)**
Track the percentage of direct employees at or above the local living wage benchmark. Target: 100% of the direct workforce, with annual milestones reported against the supplier extension roadmap.
- 3 Supply Chain Labour Rights Audit Completion Rate (%)**
Report the percentage of high-risk tier-one suppliers completing independent labour rights audits. Target: 100% audited within the reporting period, with all corrective actions tracked to satisfactory resolution.

9 INDUSTRY, INNOVATION AND INFRASTRUCTURE

Build resilient infrastructure, promote inclusive and sustainable industrialization and foster innovation

ABOUT THIS GOAL

SDG 9 emphasises building resilient infrastructure, promoting sustainable industrial development, and fostering innovation as drivers of economic growth and human well-being. For organisations, this means investing in research and development, adopting digital and sustainable technologies, building resilient and inclusive supply chains, and contributing to infrastructure that supports long-term economic and social development in their communities.

KEY UN TARGETS

- 9.4** Upgrade infrastructure and retrofit industries to make them sustainable, with increased resource-use efficiency and greater adoption of clean technologies.
- 9.5** Enhance scientific research, upgrade technological capabilities, and encourage innovation to address development challenges.
- 9.c** Significantly increase access to information and communications technology and provide universal access to the internet.

OUR APPROACH

Innovation is at the core of our competitive strategy and sustainability commitment. We invest in research and development to drive sustainable product and process improvements, adopt digital technologies that improve efficiency and reduce our environmental impact, and build supply chain resilience through diversification and responsible sourcing. We are committed to upgrading our infrastructure to meet sustainability standards and sharing innovation capacity with our supply chain and communities to build collective capability and resilience.

MATERIAL TOPICS

#Innovation & R&D . #Digital Transformation . #Sustainable Infrastructure . #Supply Chain Resilience . #Technology Access

Our materiality assessment identified innovation and infrastructure resilience as key strategic priorities, particularly given the pace of digital transformation and the increasing need for sustainable industrial practices. Failure to innovate sustainably presents both competitive risk and a missed opportunity to create shared value with our customers and communities.

OBJECTIVES

- ☒ **Increase R&D Investment in Sustainable Technologies**
Allocate a minimum percentage of revenue to research and development with a focus on sustainable product design, clean technology adoption, and circular economy solutions, publishing annual R&D investment and sustainability outcomes.
- ☒ **Achieve Digital Transformation of Key Business Processes**
Implement a digital transformation roadmap targeting key operational processes, reducing paper usage, automating routine tasks, and leveraging data analytics to drive sustainability and efficiency improvements.
- ☒ **Build Supply Chain Resilience Through Diversification**
Conduct supply chain vulnerability assessments, implement dual or multi-sourcing for critical inputs, and develop supplier capacity-building programmes to strengthen the resilience of our value chain against disruption.

KEY PERFORMANCE INDICATORS

- 1 R&D Investment (£ / % of revenue) in Sustainable Innovation**
Report total R&D investment and the proportion directed at sustainability-related innovation annually. Target: year-on-year increase in sustainable R&D spend as a percentage of total revenue.
- 2 Digital Transformation Milestone Completion Rate (%)**
Track the percentage of digital transformation milestones completed against the published roadmap each year. Report efficiency gains, cost savings, and sustainability outcomes achieved through digitisation.
- 3 Supply Chain Risk Concentration Index**
Report the proportion of critical inputs sourced from a single supplier or geography. Target: reduce single-source dependency for all identified critical inputs below a defined threshold within the reporting period.

10

Reduce inequality within and among countries

ABOUT THIS GOAL

SDG 10 calls for reducing inequalities in income, wealth, and opportunity — both within countries and between them. It highlights the need for inclusive economic policies, social protection, and the elimination of discriminatory practices. For organisations, this means creating genuinely inclusive workplaces that provide equal opportunity regardless of age, disability, ethnicity, gender, or socioeconomic background, and ensuring that business growth benefits all stakeholders equitably.

KEY UN TARGETS

10.2 Empower and promote the social, economic and political inclusion of all, irrespective of age, sex, disability, race, ethnicity or other status.

10.3 Ensure equal opportunity and reduce inequalities of outcome, including by eliminating discriminatory laws, policies and practices.

10.4 Adopt policies, especially fiscal, wage and social protection policies, and progressively achieve greater equality.

OUR APPROACH

We are committed to building an organisation that is genuinely inclusive — one where every individual, regardless of their background, has an equal opportunity to contribute, grow, and succeed. Our approach to SDG 10 focuses on pay equity across all demographic groups, proactive inclusion of underrepresented communities in hiring and promotion, and ensuring our business practices do not perpetuate social or economic disadvantage. We track intersectional pay gaps, set measurable representation targets, and report transparently on our progress annually.

MATERIAL TOPICS

#Pay Equity across All Groups . #Disability Inclusion . #Ethnic & Racial Equity . #Social Mobility . #Inclusive Practices & Policies

Inequality and inclusion risks were flagged as material through employee engagement, regulatory trends, and investor focus on DEI performance. Demographic pay gaps, underrepresentation of marginalised groups, and barriers to social mobility present legal, reputational, and talent risks that we are actively working to eliminate.

- OBJECTIVES
- ☒ **Conduct and Publish Intersectional Pay Gap Analysis**
Expand pay gap reporting beyond gender to include ethnicity, disability, and socioeconomic background. Publish full intersectional pay gap analysis annually with a defined remediation plan for all identified disparities.
 - ☒ **Achieve Representation Targets for Underrepresented Groups**
Set and publish representation targets for underrepresented groups at each level of the organisation. Develop targeted recruitment, retention, and progression programmes to achieve targets within defined timelines.
 - ☒ **Remove Barriers to Social Mobility in Recruitment**
Audit and reform recruitment practices to eliminate socioeconomic bias, including removing unpaid internships, implementing contextual recruitment, and partnering with organisations supporting candidates from disadvantaged backgrounds.

- KEY PERFORMANCE INDICATORS
- 1 Intersectional Pay Gap (% by demographic group)**
Report median pay gaps by ethnicity, disability, gender, and other protected characteristics annually. Target: eliminate statistically significant gaps across all groups within a defined timeframe.
 - 2 Representation of Underrepresented Groups (% at each level)**
Track and report the percentage of employees from defined underrepresented groups at each organisational level. Report year-on-year progress against published representation targets.
 - 3 Socioeconomic Diversity in Graduate & Apprentice Intake (%)**
Report the socioeconomic background profile of graduate and apprentice entrants annually. Target: year-on-year improvement in representation from lower socioeconomic backgrounds in early careers programmes.

11 SUSTAINABLE CITIES AND COMMUNITIES

Make cities and human settlements inclusive, safe, resilient and sustainable

ABOUT THIS GOAL

SDG 11 focuses on making cities and human settlements inclusive, safe, resilient, and sustainable. It addresses urban planning, affordable housing, public transport, and reducing the environmental impact of urban development. For organisations, this means considering the urban and community impacts of their facilities, supporting sustainable buildings, engaging with local communities, and contributing to the development of inclusive, liveable, and environmentally responsible places.

KEY UN TARGETS

- 11.3 Enhance inclusive and sustainable urbanisation and capacity for participatory, integrated and sustainable human settlement planning.
- 11.6 Reduce the adverse per capita environmental impact of cities, paying special attention to air quality and municipal waste management.
- 11.b Increase the number of cities adopting integrated policies for inclusion, resource efficiency, and climate change adaptation.

OUR APPROACH

Our physical footprint — from offices and manufacturing sites to distribution networks — has a direct impact on the communities and cities where we operate. We are committed to minimising the environmental impact of our buildings and operations, investing in green infrastructure, engaging meaningfully with local communities, and sourcing locally where possible to support economic vitality. We pursue sustainability certifications for new and refurbished facilities and work actively to reduce noise, waste, and air quality impacts on surrounding areas.

MATERIAL TOPICS

#Sustainable Buildings & Facilities . #Community Engagement . #Green Infrastructure . #Local Sourcing . #Urban Environmental Impact

Community impact and sustainable infrastructure are material topics given our physical presence across multiple urban and peri-urban sites. Our buildings, transport, waste, and community engagement practices directly affect local stakeholders and determine our social licence to operate in the communities where we are based.

OBJECTIVES

- ☒ **Achieve Green Building Certification for All New Sites**
Target BREEAM 'Excellent' or equivalent certification for all new office and operational builds, and conduct sustainability audits on existing sites to identify refurbishment opportunities for energy, water, and waste improvements.
- ☒ **Develop a Formal Community Engagement Programme**
Establish structured community consultation mechanisms at each major operating site, publishing a Community Engagement Plan annually and reporting on community issues raised, actions taken, and outcomes achieved.
- ☒ **Increase Local Procurement to 30% of Total Spend**
Grow local procurement (within 50km of operating sites) to 30% of total addressable spend by a defined date, supporting local economic development and reducing transport-related environmental impact.

KEY PERFORMANCE INDICATORS

- 1 % of Sites with Green Building Certification**
Report the percentage of operational sites with a recognised green building certification (BREEAM, LEED, or equivalent). Target: 100% of new builds certified and a year-on-year improvement in existing site ratings.
- 2 Community Engagement Actions Resolved (%)**
Track the number of community issues or concerns raised and the percentage resolved within agreed timeframes. Target: 100% of community issues logged and 90% resolved within 30 days of receipt.
- 3 Local Procurement Spend (% of total addressable spend)**
Report local procurement spend as a percentage of total addressable spend annually. Target: 30% local procurement by a defined date with year-on-year improvement milestones published.

12

RESPONSIBLE CONSUMPTION AND PRODUCTION

Ensure sustainable consumption and production patterns

ABOUT THIS GOAL

SDG 12 calls for more sustainable patterns of consumption and production across all sectors of the economy. It advocates for resource efficiency, waste reduction, sustainable supply chains, and responsible corporate practices. For organisations, this means designing out waste, transitioning to circular economy models, procuring sustainably, measuring and reducing product lifecycle impacts, and empowering consumers and stakeholders with transparent product information.

KEY UN TARGETS

- 12.2 Achieve sustainable management and efficient use of natural resources.
- 12.5 Substantially reduce waste generation through prevention, reduction, recycling and reuse.
- 12.6 Encourage companies to adopt sustainable practices and integrate sustainability information into their reporting cycles.

OUR APPROACH

Responsible resource use is a strategic priority embedded across our product design, operations, and procurement practices. We are transitioning towards a circular economy model — designing products for longevity, reparability, and recyclability, reducing waste at source, and finding productive uses for all by-products and materials. Our sustainable procurement policy ensures that environmental and social standards are applied consistently across our supply chain, reducing lifecycle impacts and driving collective improvement industry-wide.

MATERIAL TOPICS

#Waste Reduction & Recycling . #Circular Economy . #Sustainable Procurement . #Product Lifecycle Management . #Resource Efficiency

Responsible consumption and production ranked highly in our materiality assessment due to regulatory pressure, customer expectations, and direct cost implications of resource waste. As sustainability reporting requirements intensify, our ability to demonstrate circular economy credentials and responsible procurement is increasingly material to our business reputation and regulatory compliance.

OBJECTIVES

- ✓

Achieve Zero Waste to Landfill Across All Operations by 2030

Conduct waste composition audits at all sites, implement waste hierarchy-led reduction programmes, and develop partnerships with recyclers and waste-to-energy operators to divert 100% of waste from landfill by 2030.
- ✓

Implement a Circular Economy Design Standard for New Products

Develop and apply a circular economy design standard to all new product development processes, requiring consideration of end-of-life recyclability, material efficiency, and reparability as core design criteria.
- ✓

Roll Out a Sustainable Procurement Policy Across All Spend

Apply the sustainable procurement policy to 100% of new supplier contracts, including environmental and social minimum standards, and report annually on the percentage of spend covered by compliant suppliers.

KEY PERFORMANCE INDICATORS

- 1

Total Waste Generated (tonnes) & Landfill Diversion Rate (%)

Report total waste generated by category and the percentage diverted from landfill annually. Target: 100% landfill diversion by 2030 with year-on-year waste generation reduction.
- 2

Recycled or Circular Materials as % of Total Input

Track the percentage of materials and inputs that are recycled, reused, or of certified sustainable origin. Target: year-on-year increase toward a defined circular materials target.
- 3

Sustainable Procurement Coverage (% of total spend)

Report the percentage of total procurement spend covered by suppliers meeting the sustainable procurement policy criteria. Target: 100% of all new contracts and 80% of total spend by the target date.

13 CLIMATE ACTION

Take urgent action to combat climate change and its impacts

ABOUT THIS GOAL

SDG 13 calls for urgent, ambitious action to combat climate change and its devastating impacts. It urges governments and businesses to integrate climate measures into all policies, strengthen resilience to climate-related hazards, and build the capacity needed for a low-carbon transition. For organisations, this means setting science-based emissions reduction targets, disclosing climate risk through TCFD, and actively leading the transition to a net-zero economy.

KEY UN TARGETS

- 13.1** Strengthen resilience and adaptive capacity to climate-related hazards and natural disasters.
- 13.2** Integrate climate change measures into national policies, strategies, and planning frameworks.
- 13.3** Improve education, awareness-raising and capacity on climate change mitigation, adaptation, and early warning.

OUR APPROACH

The climate crisis is the defining challenge of our generation, and we are committed to being part of the solution. Our climate strategy is aligned to the Paris Agreement's 1.5C pathway, with science-based emissions reduction targets across Scope 1, 2, and 3. We integrate climate risk and opportunity into our enterprise risk management through TCFD-aligned scenario analysis. Beyond our operations, we leverage our supply chain, stakeholder relationships, and industry influence to advocate for systemic change while delivering our own commitments with rigour.

MATERIAL TOPICS

#Carbon Emissions (Scope 1, 2 & 3) . #Energy Efficiency . #Renewable Energy Transition . #Climate Risk & Resilience . #Supply Chain Decarbonisation

TCFD-aligned climate risk assessment underpins our materiality determination for SDG 13. Climate change is our highest-priority material topic based on financial risk exposure, evolving regulatory requirements, investor expectations, and multi-stakeholder materiality outcomes that consistently place it at the apex of our risk and opportunity landscape.

OBJECTIVES

- ☒ **Develop a Science-Based Net-Zero Emissions Roadmap (SBTi)**
Produce and publish a decarbonisation roadmap validated by SBTi, aligned to the 1.5C pathway, with interim net-zero targets for Scope 1 & 2 by 2040 and full value chain neutrality by 2050.
- ☒ **Transition to 100% Renewable Energy Across All Operations by 2030**
Transition total energy consumption to 100% renewable sources through on-site generation, long-term Power Purchase Agreements, and REGo-certified procurement, with an interim 60% target by FY2026.
- ☒ **Embed Annual TCFD-Aligned Climate Risk Disclosure**
Conduct annual TCFD scenario analysis covering physical and transition risks, integrate outputs into the enterprise risk register, and publish results in the ESG report aligned to regulatory disclosure requirements.

KEY PERFORMANCE INDICATORS

- 1 Total GHG Emissions (tCO2e) — Scope 1, 2 & 3**
Report absolute Scope 1, market-based Scope 2, and material Scope 3 emissions against a defined baseline year, with SBTi-aligned reduction milestones and full GHG Protocol methodology disclosed.
- 2 Renewable Energy Consumption (% of total)**
Track the percentage of total energy from renewable sources. Target: 60% by FY2026 and 100% by FY2030, reported with full methodology including any EACs or REGos applied.
- 3 Carbon Intensity Ratio (tCO2e per GBPm revenue)**
Report carbon intensity against revenue targeting a minimum annual reduction, demonstrating continuous efficiency improvement and decoupling of business growth from emissions growth.

14 LIFE BELOW WATER

Conserve and sustainably use the oceans, seas and marine resources for sustainable development

ABOUT THIS GOAL

SDG 14 focuses on protecting and restoring marine ecosystems, reducing ocean pollution, combating acidification, and ensuring sustainable use of marine resources. For organisations, this means reducing plastic waste, preventing water pollution, supporting sustainable seafood practices, and minimising any operational impacts on coastal and marine environments. The health of our oceans is intrinsically linked to climate stability, biodiversity, and food security.

KEY UN TARGETS

- 14.1** Prevent and significantly reduce marine pollution of all kinds, in particular from land-based activities.
- 14.2** Sustainably manage and protect marine and coastal ecosystems and strengthen their resilience.
- 14.6** Prohibit certain forms of fisheries subsidies which contribute to overcapacity and overfishing.

OUR APPROACH

Our approach to SDG 14 focuses on eliminating single-use plastics from our operations and supply chain, preventing water pollution through wastewater management, and ensuring responsible sourcing of any marine or ocean-derived ingredients. We support initiatives to protect marine biodiversity through corporate partnerships and financial contributions, and engage our supply chain to prevent plastic and chemical pollution reaching waterways and oceans from our extended value chain .

MATERIAL TOPICS

#Plastic Reduction & Elimination . #Ocean Protection . #Sustainable Seafood Sourcing . #Marine Biodiversity . #Water Pollution Prevention

Ocean health and plastic waste are material to our operations through product packaging, ingredient sourcing, and the risk of operational water pollution. Regulatory trends on single-use plastics and extended producer responsibility make plastic reduction a direct regulatory compliance risk as well as a reputational priority for our brand.

OBJECTIVES

- ☒ **Eliminate Single-Use Plastic Packaging by 2025**
Audit all product and operational packaging, set elimination targets for all single-use plastics, and transition to reusable, recyclable, or compostable alternatives, with 100% elimination of identified single-use plastics by 2025.
- ☒ **Achieve Zero Operational Plastic Discharge to Waterways**
Implement waste management protocols at all operational sites to prevent any plastic waste entering waterways, with 100% of sites audited annually and corrective actions tracked to completion.
- ☒ **Source 100% of Marine Ingredients from Certified Sustainable Sources**
Map all marine-derived ingredients in products and supply chains, transition to MSC, ASC, or equivalent certified sustainable sources for 100% of material marine ingredients within a defined timeframe.

KEY PERFORMANCE INDICATORS

- 1 Single-Use Plastic Reduction (tonnes / % eliminated)**
Report total single-use plastic eliminated from products and operations in tonnes and as a percentage of the baseline. Target: 100% elimination of identified single-use plastics by the target date.
- 2 Sites with Zero Plastic-to-Waterway Incidents (%)**
Track the number of plastic pollution incidents affecting waterways from operational sites. Target: zero incidents across all sites, with annual audit completion rates and corrective action resolution tracked.
- 3 Sustainable Marine Ingredient Sourcing Rate (%)**
Report the percentage of material marine-derived ingredients sourced from certified sustainable sources. Target: 100% sustainable sourcing for all material marine ingredients by the target date.

Protect, restore and promote sustainable use of terrestrial ecosystems

ABOUT THIS GOAL

SDG 15 aims to protect and restore land-based ecosystems, halt deforestation, combat desertification, and reverse land degradation and biodiversity loss. For organisations, this means eliminating deforestation from supply chains, protecting biodiversity on and around operational sites, sourcing materials from sustainably managed forests and lands, and investing in nature-based solutions that restore rather than degrade the natural world.

KEY UN TARGETS

- 15.1** Ensure conservation, restoration and sustainable use of terrestrial and freshwater ecosystems.
- 15.2** Promote sustainable management of all types of forests, halt deforestation, and restore degraded forests.
- 15.5** Take urgent action to reduce the degradation of natural habitats, halt biodiversity loss and protect threatened species.

OUR APPROACH

We recognise that our business depends on the health of natural systems — from the agricultural commodities we source to the communities that rely on ecosystem services. Our approach to SDG 15 focuses on eliminating deforestation and land conversion from our supply chains, conducting biodiversity assessments at operational sites, investing in ecological restoration, and aligning our nature-related disclosures to TNFD. We are committed to having a net positive impact on nature by 2030.

MATERIAL TOPICS

#Deforestation Prevention . #Biodiversity Protection . #Sustainable Land Use . #Nature-Based Solutions . #Ecosystem Restoration

Nature and biodiversity are material to our business through supply chain dependencies on land-based commodities, regulatory risk from deforestation legislation, and growing investor and stakeholder expectations for TNFD-aligned nature disclosures. Deforestation risk in our supply chain presents significant reputational and regulatory exposure that we are actively managing.

OBJECTIVES

- ☒ **Achieve Zero Deforestation Across Our Entire Supply Chain**
Map all land-use-risk commodities in our supply chain and implement a zero-deforestation commitment traceable to farm or forest of origin for 100% of priority commodities, with third-party verification published annually.
- ☒ **Conduct Biodiversity Impact Assessments at All Major Sites**
Complete TNFD or equivalent biodiversity impact assessments at all major operational sites, identify priority actions to protect or restore biodiversity, and publish site-level biodiversity plans with measurable targets.
- ☒ **Invest in Nature-Based Solutions to Offset Residual Land Impact**
Allocate investment to verified, high-quality nature-based solutions — including habitat restoration, reforestation, and wetland conservation — to address residual land-use impacts and contribute to net positive biodiversity outcomes.

KEY PERFORMANCE INDICATORS

- 1 Zero Deforestation Compliance Rate (% of priority commodities)**
Report the percentage of priority land-use commodities sourced in compliance with the zero-deforestation commitment. Target: 100% traceable and verified compliance for all priority commodities by the target date.
- 2 Sites with Biodiversity Management Plans in Place (%)**
Track the percentage of major operational sites with a current biodiversity impact assessment and management plan. Target: 100% of sites with measurable biodiversity targets by the target date.
- 3 Nature-Based Solutions Investment (£ / hectares restored)**
Report total investment in verified nature-based solutions and the resulting area of habitat restored, protected, or enhanced. Target: year-on-year increase in investment aligned to net positive nature commitment.

16 PEACE, JUSTICE AND STRONG INSTITUTIONS

Promote peaceful and inclusive societies for sustainable development, provide access to justice for all

ABOUT THIS GOAL

SDG 16 promotes peaceful, just, and inclusive societies through strong institutions, the rule of law, and access to justice for all. For organisations, this translates into robust anti-corruption frameworks, business ethics policies, transparent governance, human rights due diligence, whistleblower protection, and responsible political engagement. Strong institutional practices are the foundation on which all other sustainability commitments depend.

KEY UN TARGETS

- 16.3** Promote the rule of law at the national and international levels and ensure equal access to justice for all.
- 16.5** Substantially reduce corruption and bribery in all their forms.
- 16.6** Develop effective, accountable and transparent institutions at all levels.

OUR APPROACH

We are committed to the highest standards of ethical conduct, transparency, and accountability across all our operations and relationships. Our approach to SDG 16 is grounded in a zero-tolerance policy for bribery and corruption, robust human rights due diligence aligned to the UN Guiding Principles, comprehensive whistleblower protections, and transparent ESG reporting. We hold our entire supply chain to equivalent standards, conduct third-party ethics audits, and engage proactively with regulators to support good governance in our sector.

MATERIAL TOPICS

#Anti-Bribery & Corruption . #Business Ethics & Integrity . #Transparency & Governance . #Human Rights Due Diligence . #Whistleblower Protection

Governance and ethics are foundational material topics identified by investors, regulatory assessors, and board stakeholders. Bribery, corruption, and human rights violations present the highest severity risks to our business integrity, licence to operate, and stakeholder trust, making strong institutional practices a non-negotiable priority in our sustainability framework.

OBJECTIVES

- ☒ **Maintain Zero Tolerance Anti-Bribery & Corruption Framework**
Operate a comprehensive anti-bribery and corruption (ABC) programme aligned to the UK Bribery Act and applicable international standards, with annual staff training, third-party due diligence, and independent audits of compliance.
- ☒ **Implement Human Rights Due Diligence Across the Value Chain**
Conduct annual human rights impact assessments aligned to the UN Guiding Principles, covering our own operations and supply chain. Publish an annual Modern Slavery and Human Rights Statement with actions taken and outcomes.
- ☒ **Enhance Transparency Through Comprehensive ESG Disclosure**
Report against internationally recognised ESG disclosure standards (GRI, SASB, TCFD, or equivalent), achieving external assurance on material data points and ensuring stakeholders have timely access to accurate sustainability performance data.

KEY PERFORMANCE INDICATORS

- 1 Anti-Bribery & Corruption Training Completion Rate (%)**
Report the percentage of employees completing mandatory ABC training within the required annual cycle. Target: 100% completion rate for all employees and contractors with access to company resources or third-party relationships.
- 2 Ethics Hotline Reports Resolved Within 30 Days (%)**
Track the number of reports received via the ethics hotline/speak-up channel and the percentage resolved within 30 business days. Target: 100% of substantiated reports receiving a documented resolution within the timeframe.
- 3 ESG Disclosure Assurance Coverage (% of material metrics)**
Report the percentage of material ESG metrics receiving independent external assurance. Target: year-on-year increase in assured metrics, with a defined target for full limited assurance on all material data.

17

PARTNERSHIPS
FOR THE GOALS

Strengthen the means of implementation and revitalize the global partnership for sustainable development

ABOUT THIS GOAL

SDG 17 recognises that achieving the global sustainability agenda requires collaborative partnerships across governments, businesses, civil society, and international organisations. For businesses, this means active participation in industry initiatives, transparent reporting to global standards, sharing knowledge and best practices, engaging constructively with policymakers, and building multi-stakeholder partnerships that accelerate progress on the SDGs collectively.

KEY UN TARGETS

17.16 Enhance the global partnership for sustainable development, complemented by multi-stakeholder partnerships that mobilise and share knowledge and expertise.

17.17 Encourage and promote effective public, public-private and civil society partnerships, building on experience and resourcing strategies of partnerships.

17.19 Build on existing initiatives to develop measurements of progress that complement GDP and support statistical capacity-building.

OUR APPROACH

We believe that no organisation can meet the scale of the SDG challenge alone. Partnership, collaboration, and knowledge-sharing are at the heart of our sustainability approach. We actively participate in industry coalitions and working groups, engage constructively with NGOs and community organisations, report transparently against internationally recognised standards, and contribute to collective action initiatives that accelerate progress beyond what we could achieve through internal efforts alone. We also engage our supply chain as a partner in sustainability rather than merely a compliance requirement.

MATERIAL TOPICS

#Stakeholder Engagement . #Industry Coalitions & Initiatives . #NGO & Community Partnerships . #Global Reporting Standards . #Supply Chain Collaboration

Partnerships and collaborative governance were identified as material through our stakeholder mapping exercise. The scale and interconnectedness of the SDGs require collective action, and our ability to deliver credible, verifiable sustainability impact depends on the quality of our stakeholder relationships, the strength of our reporting standards, and the breadth of our collaborative commitments.

OBJECTIVES

- ☒ **Actively Participate in at Least Three Industry SDG Initiatives**
Identify, join, and contribute meaningfully to a minimum of three credible industry coalitions or multi-stakeholder initiatives aligned to our material SDGs, reporting annually on participation, contributions, and outcomes achieved.
- ☒ **Align ESG Reporting to GRI, SASB, and TCFD Standards**
Produce an integrated sustainability report fully aligned to GRI Standards, SASB sector standards, and TCFD recommendations, with independent limited assurance on all material quantitative disclosures.
- ☒ **Engage 100% of Strategic Suppliers in Sustainability Collaboration**
Move from compliance-focused supplier engagement to collaborative sustainability partnerships with all strategic suppliers, co-developing improvement plans, sharing tools and expertise, and publicly reporting on supplier sustainability progress.

KEY PERFORMANCE INDICATORS

- 1

Number of Active Industry SDG Partnerships
Report the number of active industry coalitions, multi-stakeholder initiatives, and partnerships contributing to SDG delivery. Target: participation in at least three credible initiatives with documented contributions and outcomes each year.
- 2

ESG Reporting Standards Coverage & Assurance Level
Report the percentage of material sustainability metrics covered by GRI, SASB, and TCFD disclosures, and the level of independent external assurance obtained. Target: full limited assurance on all material quantitative metrics.
- 3

Strategic Suppliers with Active Sustainability Improvement Plans (%)
Track the percentage of strategic suppliers with co-developed, active sustainability improvement plans. Target: 100% of strategic suppliers engaged in collaborative sustainability programmes with documented progress.

Key Performance Indicators

New KPI

In Progress

Ongoing Commitment

Maintain
Healthy and
Safe Work
Environment
Promoting
Diversity,
Inclusion,
Transparency,
and Fairness

Status	KPI Target	Road Map	KPI Journey
	Ensure that job descriptions are clear and provide accurate information on job requirements and responsibilities.	• New KPI adopted this year. • All Job roles to carry Job descriptions. • Implement by June 2024.	
	Implement a performance management system that is fair, objective, and based on merit.	• New KPI adopted this year. • Ongoing long-term commitment. • Inculcate trust and transparency.	
	Develop and implement a parental leave policy that provides equal opportunities for men and women employees to take parental leave.	• New KPI adopted this year. • Ongoing long-term commitment. • Parental leave policy guidelines – December 2024.	
	Develop and implement a D&I (diversity and inclusion) policy that promotes gender equality and provides equal opportunities for all employees.	• New KPI adopted this year. • Ongoing long-term commitment. • D&I Policy – December 2024.	
	Offer flexible work arrangements that accommodate diverse lifestyles and enable a work-life balance for all employees specially women and employees with caregiver responsibilities.	• New KPI adopted this year. • Ongoing long-term commitment. • Encourage employees to communicate special circumstances.	

Commit to Employee and Other Stakeholder Skills Development to Ensure Initiative, Partnership, **Reduced Inequalities and Overall Economic Growth**

4

QUALITY EDUCATION

5

GENDER EQUALITY

8

DECENT WORK AND ECONOMIC GROWTH

Status	KPI Target	Road Map	KPI Status / Progress
	Provide necessary resources, such as a mentorship program, training materials, and feedback mechanisms.	• New KPI adopted this year. • Ongoing long-term commitment. • Trade Internship opportunities aligned with GTP/ESG.	
	Provide opportunities for employees to attend internal and external training programs, workshops, and conferences.	• New KPI adopted this year. • Ongoing long-term commitment. • Internal and external sources and channels.	
	Track and reduce gender and racial pay gaps and ensure healthcare coverage for all employees.	• New KPI adopted this year. • Ongoing long-term commitment. • Start track data using sustainability management system.	

Adopt Sustainable Practices and Ensure **Efficient use of Resources** by Reducing Waste Generation through Prevention, Recycling, and Reuse.

Status	KPI Target	Road Map	KPI Status/ Progress
	Monitor and measure our energy consumption and carbon footprint to track progress and identify further opportunities for improvement	• Ongoing long-term commitment: yearly tracking • Identify data sources to collect information. • Use sustainability management system to collect data, monitor and track.	
	Reduce waste by using reusable containers and eliminating single-use plastics	• Ongoing long-term commitment: yearly tracking • Elicit employees' commitments. • Discourage single use plastic packaging for food items.	
	Implement purchasing policies and guidelines that prioritize sustainable products and materials.	• New KPI adopted this year. • Ongoing long-term commitment. • Guidance through internal communication and purchase policy decisions.	
	Reduce business reliance on cold based fertilizers producers.	• Ongoing long-term commitment. • Soil health and fertility awareness. • Educate, promote, monitor & evaluate.	

Adhere to Ethical Principles, Promote Integrity, and Practice Responsible Governance for **a Transparent, Fair, and Accountable Organisation**

Status	KPI Target	Road Map	KPI Status / Progress
	Suppliers are approved after thorough checks and ascertaining credit worthiness by assessing track record, industry feedback, consultation with the ground staff, financial statements and company information, wherever available.	• Ongoing long-term commitment • KYC/AML policy • Supplier Checks and market feedback	
	KYC form to be filled for each new counterparty by the trader in-charge, exception to be approved by Senior Management Committee Members as per Risk Management Policy.	• Ongoing long-term commitment • Mandatory KYC template. • Information warehouse.	
	Developing systems, policies, procedures, arrangements and controls to ensure effective risk management is exercised and promoted within our Group culture.	• Ongoing long-term commitment • Policy store for quick reference. • Internal & external communication.	

Engaging stakeholders to ensure inclusivity, collaboration and collective action towards achieving global goals

Status	KPI Target	Road Map	KPI Status/Progress
	Develop a green living guide that provides practical tips and advice on sustainable living, such as reducing energy consumption, waste reduction, and sustainable transportation options.	• New KPI adopted this year • Develop a dynamic document that incorporates stakeholders' inputs and feedback • Completion target – June 2024	
	Encourage employees to attend sustainability workshops that cover a range of topics, such as sustainable food choices, reducing carbon footprint, and green home practices.	• Ongoing commitment • Provide choices of workshops and webinars • Internal and external sources	
	Update and communicate our sustainability initiatives, including progress reports, tips, and advice.	• Ongoing commitment • Annual sustainability reporting • Share with internal & external stakeholders in the eco-system	

A Promise to the Future

[Company Name] is committed to building a fairer, more inclusive, and resilient business — one that measures success not just in financial terms, but in its lasting impact on people and the planet. Our six-pillar roadmap guides this journey:

Sustainability Assessment — Evaluate our environmental, social, and governance performance to establish baselines, identify gaps, and set specific, measurable targets aligned with our core strategy.

Stakeholder Engagement — Actively involve employees, customers, suppliers, and communities in our sustainability journey. Collaborate with external partners and organisations to amplify collective impact.

SMART Objectives — Define Specific, Measurable, Achievable, Relevant, and Time-bound goals for every sustainability pillar, ensuring clear accountability across the organisation.

Action Planning — Assign responsibilities, allocate resources, and set clear timelines. Break long-term goals into actionable milestones to maintain focus and drive consistent progress.

Monitor & Report — Track our progress through a robust evaluation system and communicate results transparently to all stakeholders — building trust and credibility through every annual report.

Foster a Sustainability Culture — Train and empower employees to champion sustainability in everyday decisions. Embrace continuous improvement and stay ahead of emerging trends, technologies, and best practices.
